Giving Professional Rugby a Helping Hand

InterX is confirmed as an important part of the rehabilitation program for England in the 2007 Rugby World Cup Tournament

Plano, Texas, USA – **Neuro Resource Group (NRG)**, the manufacturer of **InterX®** products, announced that InterX products were included in the rehabilitation programs of several England rugby players in the Rugby World Cup Tournament in 2007.

Jason Robinson received InterX Therapy as part of his rehabilitation program following a hamstring injury during England's first game against South Africa in the World Cup tournament. Phil Pask, the Senior Physio for the England team for the last three Rugby World Cups, explains how he implemented InterX into his treatment protocol.

"I used InterX Therapy as part of our intensive rehabilitation program to see if we could get Jason back into the tournament. With a confirmed grade two hamstring tear, I expected that pain and inflammation would restrict the intensity of and progression through the rehabilitation process. However, using InterX, I was able to significantly reduce Jason's nociceptive pain following the injury and facilitate an intensive manual therapy and exercise rehabilitation protocol which definitely optimized his recovery time. This injury would normally have a 4-6 week prognosis, but Jason was back in full training after three weeks which allowed him to play in the Quarter Final game against Australia – and ultimately England to progress through to the final".

Jason Robinson went on to play in the Semi-Final against France where he collected his 50th cap and in the Final against South Africa.

ABOUT InterX®

[InterX®](#) products are portable, handheld neurostimulation devices that provide a safe, non-drug, non-invasive therapy that enhances rehabilitation following injury or surgery. [InterX®](#) products also provide an effective treatment for chronic conditions, helping people who are suffering from pain and poor function to get back to an active life.

[InterX®](#) delivers highly specific, targeted, dynamic electrical stimulation resulting in effective pain relief. This unique technology has been developed and re-designed to provide [InterX®](#) FDA cleared and CE marked medical products with defined treatment applications for healthcare professionals.

[InterX®](#) products are available to licensed healthcare professionals, including MD's, physical therapists and chiropractors for the treatment of a wide range of acute and chronic pain conditions; [InterX®](#) is also widely used throughout [sports medicine](#). [InterX](#) personal products are available to individuals. (Prescriptions are required in US & Canada).

ABOUT NRG

Since its formation in 2004, Neuro Resource Group (NRG) has been committed to investing its resources into the research of the effects and associated outcomes observed with InterX® Therapy as an adjunct to standard rehabilitation. A total of 8 random controlled trials (RCT) have already been completed the first of which was published in the Journal of Bone and Joint Surgery (Br) in November 2007. In addition, a study that examines the 'influence of neurostimulation in a transected medial collateral ligament in sheep' was recently presented at the 6th Combined Meeting of the Orthopaedic Research Society and is due to be published in 2008.

InterX® Clients

The list of clients whose patients and/or teams have been changed by InterX® products is truly impressive and includes:

- Physiotherapists and Doctors in the UK and International
- Professional Rugby and International Football
- Hospitals and Clinics in the UK and International
- Professional Sports teams in the NFL, NBA, MLB, NHL and MLS
- The US Military
- Qualified & Licensed Health Care Practitioners
